VETARZO BRAIN AND NERVE FOOD.

This remarkable compound, the result of the latest developments and achievements of modern chemistry, pharmacology, and therapeutics, is without equal in all cases of defective nerve power, whether induced by worry, overwork, unhealthy climate, dissipation, excess, youthful impudence, or other influences incident to the wear and tear and haste of modern life. It is a powerful tonic and invigorant, and its effects are almost magical in the case of general debility, discolored complexion, and loss of vitality. It is a powerful tonic and invigorant, and its effects are almost magical in the case of general debility, discolored complexion, and loss of vitality. It is a powerful tonic and invigorant, and its effects are almost magical in the case of general debility, discolored complexion, and loss of vitality.

VETARZO BLOOD MEDICINE.

Never before was there anything like it, nor can its marvelous properties ever be equalled in all cases of poor blood, impurity, or other imperfection of the blood from whatever cause arising. No sooner is it introduced into the system than it permeates and penetrates to the minutest capillaries, overcoming and expelling the virus of disease, and restoring the system to its normal state. It is a powerful tonic and invigorant, and its effects are almost magical in the case of general debility, discolored complexion, and loss of vitality. It is a powerful tonic and invigorant, and its effects are almost magical in the case of general debility, discolored complexion, and loss of vitality.

THESE DOCKS are conveniently situated in Yokohama harbour and the advantages offered for Docking and repairing Vessels and Machinery of every description.

The plant and tools are of recent patterns for dealing quickly and cheaply with work and a large stock of material is always at hand, (plates and angles all being tested by Lloyd's surveyors).

Two powerful Twin Screw Tugboats are available for taking Vessels in or out of Dock, and for taking Sailing Vessels in or out of the bay. The floating derrick is capable of lifting 40 tons.

Steam Launches of Steel or Wood, Lighters, Steel Buildings and Roofs, Bridge Work, and all kinds of Machinery are made on the premises.

Tenders will be made up when required and the workmanship and material will be guaranteed.

The cost of Docking, and repair work, will be found to compare favorably with that of any port in the world.

A large mooring basin is available alongside our own works for mooring vessels whilst under repairs.

THE CHINESE FLOUR MILL CO., LTD.

ANNUAL MEETING.

The fifteenth annual general meeting of shareholders in the above company was held at Shanghai on 16th inst. There were present:—Messrs. A. McLeod (presiding), J. J. Such, Chas. Rayner and Walter Scharf (directors), J. M. Young, A. O. Hunter, Q. Rithausen, Chang Yuen-ching, E. H. Gibson and R. E. Kadoorie, representing 819 shares.

The notice convening the meeting having been read, the Chairman spoke as follows:—

Gentlemen:—The printed accounts and report having been in your hands for some time, I will, with your permission, take them as read. The accounts have been made up on the same lines as in previous years and call for little comment on my part. On the Dr. side of the balance-sheet you will observe "sundry creditors" stands at Tls. 217,915.07. This amount (representing, chiefly, the overdraft with our bankers, December 31, 1909, and is covered by stocks valued at Tls. 218,216.47. All our stock of flour, bran, etc., have since been disposed of at prices above those at which they were valued when stock-taking. "Bills Payable," Tls. 4,053.76, have since been taken up, and represent cost of gunny bag, etc. The profit and loss account shows a balance in our favour of Tls. 42,647.96, which the directors propose to deal with as specified in the report, viz:—

General managers' participation in Tls. profits as per agreement..... 2,414.28

Write off buildings..... 3,000.00

" " machinery..... 9,000.00

Pay dividend at the rate of Tls. 3

per share..... 18,000.00

Carry to reserve..... 10,000.00

" forward to new account..... 233.68

Tls. 42,647.96

Machinery: Our power and milling plants are in excellent working order. The greatest attention is constantly paid to the upkeep of the machinery, and all necessary repairs are immediately attended to, and the cost of such repairs is charged to the working account. The erection of the same plant as the shareholders now own would cost considerably more than the present book value. A number of additions to the machinery, costing Tls. 3,047.25 represent an exhaust arrangement whereby the cleaning department is kept free of fine dust, thus not only reducing the wear and tear of the cleaning machinery, but also minimising the possible danger of fire. It also includes a valuable wheat receiving plant in the godown which enables us to clean all the wheat as soon as it is landed. No doubt you will be aware Chinese wheat is very dirty, and wheat stored in such a condition is certainly more liable to turn bad and get heated than wheat cleaned before being stored. From machinery account it is proposed to write off Tls. 9,000 from last year's earnings.

With the buildings and property I should like to say together. After writing off Tls. 3,000.00 from buildings as proposed in the report, the figure representing this item is below—Tls. 100,000.00. The property shows a book value of Tls. 38,014.58, but like the buildings, this figure is much below its actual value. If an expert valuation was made on the property and buildings, it would most probably reveal figures showing that the capital liability of the company is fully covered by the value of these two items alone. As pointed out in the report, the directors have kept on improving the property by acquiring small adjoining lots of land, raising such land with ashes from the boilers, sand stone, in which impurities the native wheat is unfortunately so rich, also by filling in old creeks. The total area now owned by the company is about 40 mu and the value of the land, including the bunding and jetty, may be estimated at Tls. 4,000.00 per mu, making the total value approximately Tls. 160,000.00 against the book value of only Tls. 38,014.58. The buildings in our opinion are worth fully 50 per cent more than their book value and if you total up these valuations it will be found that the sum total is tantamount to the capital of the company, and the other assets like machinery, furniture, telephones, etc., representing additional security.

These remarks are all I have to say on the balance sheet now before you, but before moving the adoption of the accounts I shall be pleased to answer any question the shareholders may wish to ask me.

No questions were asked, and the Chairman proposed, and Mr. Such seconded, that the report and accounts as presented be accepted and passed. This was carried.

A dividend at the rate of six per cent. per annum was ordered to be paid, on the proposition of the Chairman, seconded by Mr. Rayner.

Mr. A. McLeod was re-elected a director, on the proposition of Mr. J. M. Young, seconded by Mr. A. O. Hunter.

Mr. A. C. Hunter proposed the re-election of Messrs. Lowe, Bingham and Mathews as the company's auditors. This was seconded by Mr. Young and carried.

It was announced that dividend warrants would be posted to-day, and the meeting terminated with a vote of thanks to the Chairman, proposed by Mr. Young.

WEATHER FORECAST AND STORM WARNINGS ISSUED FROM THE HONGKONG OBSERVATORY.

METHEOLOGICAL SIGNALS.

Meteorological signals are hoisted on the mast in front of the Water Police Station at Tsim Sha Tsui for the information of masters of vessels leaving the port. They do not necessarily imply that bad weather is expected here.

1. A CONE point upwards	Indicates a Typhoon to the North of the Colony.
2. A CONE point upwards and DRUM below	Indicates a Typhoon to the North-East of the Colony.
3. A DRUM	Indicates a Typhoon to the East of the Colony.
4. A CONE point downwards and DRUM below	Indicates a Typhoon to the South-East of the Colony.
5. A CONE point downwards	Indicates a Typhoon to the South of the Colony.
6. A CONE point downwards and BALL below	Indicates a Typhoon to the South-West of the Colony.
7. A BALL	Indicates a Typhoon to the West of the Colony.
8. A CONE point upwards and BALL below	Indicates a Typhoon to the North-West of the Colony.

Red Signals indicate that the centre is believed to be more than 300 miles away from the Colony.

Black Signal, indicates that the centre is believed to be less than 300 miles away from the Colony.

The above signals will, as heretofore, be hoisted only when typhoons exist in such positions or are moving in such directions that information regarding them is considered to be of importance to the Colony or to shipping leaving the harbour.

These signals are repeated at the Harbour Office, H.M.S. Tamar, Green Island Signal Mast, and the Flagstaff on the premises of the Hongkong and Kowloon Wharf and Godown Company at Kowloon.

URGENT SIGNAL.

In addition to the above, when it is expected that the wind may increase to full typhoon force at any moment, the following Urgent Signal will be made at the Water Police Station, and repeated at the Harbour Office:—

THREE EXPLOSIVE BOMBS, AT INTERVALS OF TEN SECONDS.

A Black Cross will be hoisted at the same time, superior to the other shapes.

NIGHT SIGNALS.

The following Night Signals will be exhibited from the Flagstaff on the roof of the Water Police Station at Kowloon, the Harbour Office Flagstaff, and H.M.S. Tamar.

I. Three Lights Vertical, Green Green Green, indicates that a typhoon is believed to be situated more than 300 miles from the Colony.

II. Three Lights Vertical, Green Red Green, indicates that a typhoon is believed to be situated less than 300 miles from the Colony.

III. Three Lights Vertical, Red Green Red, indicates that the wind may be expected to increase to full typhoon force at any moment.

No. III. Signal will be accompanied by the Explosive Bombs, as above, in the event of the information conveyed by this signal being first published by night.

These Night Signals will be substituted the Day Signals at sunset, and will, when necessary, be altered during the night.

SUPPLEMENTARY WARNINGS.

For the benefit of Native Craft and passing Ocean Vessels, a Cone will be exhibited at each of the following stations during the time that any of the above Day Signals are hoisted in the Harbour.

Gap Rock.	Aberdeen.
Stanley.	Sau Ki Wan.
Stanley.	Sai Kung.
Cape Collinson.	Sha Tau Kok.
Tai Po.	Tai Po.

This will indicate that there is a depression somewhere in the China Sea, and that a Storm Warning is hoisted in the Harbour.

Further details can always be given to Ocean Vessels, on demand, by signal, from the Light House.

F. C. Fong, Director.

RUBBER RETURNS.

The following January returns are noted: Harpenden 3,045, United Sumatra 3,044.

CATTLEFIELDS.

Kuala Lumpur, March 17.
It is understood that Castlefield Rubber Company is issuing fresh capital of one pound shares at fifty shillings premium.

The Planters' Stores have a London wire to the effect that Fine hard para is at 10/4 per pound.

BOLLION.

Messrs. Samuel Montagu & Co.'s Circular dated London, February 24, contains the following:

Gold.—The arrivals of bar gold from the Cape, about £450,000, barely sufficed for the requirements of the market. The bulk of the supplies were snapped up for the Continent, and the demand for India was rather more active than usual. The quotation rose on Monday to 77s. 8 1/2 p. or, Std. It is estimated that the world's gold production for 1909 is £94,700,000 compared with £91,300,000, £84,700,000 and £83,300,000 in 1908, 1907 and 1906 respectively. During the latter part of 1909 the output of the Witwatersrand district sustained a partial check owing to labour difficulties.

The following amounts were received by the Bank of England:—

Feb. 17, £149,000 in bar gold.

" 18, 29,000 "

" 21, 5,000 in sovereigns from Australia.

Withdrawals were made as under:—

Feb. 17, £242,000 in sovereigns for South America.

" 17, 50,000 in sovereigns for Buenos Aires.

" 18, 310,000 in sovereigns for Paris.

" 19, 200,000 in sovereigns for Buenos Aires.

" 19, 50,000 in sovereigns for The River Plate.

" 21, 310,000 in sovereigns for Paris.

" 22, 100,000 in sovereigns for Paris.

The sovereigns for Paris above referred to were withdrawn to repay advances made in sovereigns by the Bank of France against bills.

It will be remembered that these advances were made on condition that repayment should be made in sovereigns as the bills fell due.

The net efflux during the week amounts to £1,080,000.

Silver.—The market again reverted to a sluggish condition. At present there is but little competition to enliven it, and, in the absence of tempting prices, sellers are far from plentiful. Below and round about 24d., there is a fair demand for China, and we think the outlook a hopeful one as the Shanghai stock still remains stationary at its reduced level. The off-take in India has fallen to 125 bars a day.

A careful estimate of the world's output for 1909 has been made in New York; the principal details are given as follows:—

We attach these for 1908 for purposes of comparison.

1908.

United States 55,449,000 oz.

Mexico 75,000,000 oz.

Australia 17,000,000 oz.

All other producers (including Canada) 68,000,000 oz.

1909.

United States 55,449,000 oz.

Mexico 75,000,000 oz.

Australia 17,000,000 oz.

All other producers (including Canada) 68,000,000 oz.

1910.

United States 55,449,000 oz.

Mexico 75,000,000 oz.

Australia 17,000,000 oz.

All other producers (including Canada) 68,000,000 oz.

Representing, at the average price of each year..... £ 21,106,451

1908.

United States 52,410,690 oz.

Mexico 73,564,627 oz.

Australia 17,175,999 oz.

All other producers (including Canada) 59,905,444 oz.

203,186,370

Representing, at the average price of each year..... £ 20,536,116

A shipment of £35,000 has been made from San Francisco to Hongkong.

THE SOY BEAN COITON SPINNING CO., LTD.

ANNUAL MEETING.

The fifteenth ordinary meeting of the above company was held at the offices of Messrs. Arnhold, Karberg & Co. at Shanghai on 15th inst. The Chair was occupied by Mr. M. Mittag (Chairman) and there were also present: Messrs. A. Hostler (vice-chairman), Ho Hsien-chuen (directors), H. Arnhold (general manager), E. Grosser (secretary), Vice-Consul Dr. Ney (of the German Consulate), Messrs. G. Gallis, M. Niclussen and J. Stampf (shareholders), representing in all 1,203 shares.

The notice convening the meeting having been read by the Secretary, the Chairman, in opening the proceedings, said:—Before proceeding with the formal business of the meeting I extremely regret to have to announce the death of Mr. Woo Saw-chin, which took place on the 5th February. The deceased gentleman had been connected with our Company since its inception both as a member of directors and as a proprietor of the Mill, and I request you to raise him in memory. The report and accounts have been in your hands for some time and with your permission I will as usual take them as read. The Mill has worked satisfactorily throughout the year and the result which you have before you must be considered in every respect satisfactory as during the last three months of the year under review the position has been exceedingly unfavorable for the cotton industry. The inclement weather during the autumn enabled farmers to bring the new cotton crop to the market very slowly and to force up prices to over 12s. 2d per picul with such high prices the vexed question of watered cotton has become more acute than ever and there seems very little prospect of this evil being overcome. Prospects for the present year are not favorable owing to the unsatisfactory state of the local market. Fortunately we have been able to secure a fair quantity of Indian cotton at advantageous prices, so that our Mill is not entirely dependent on this market. Referring to the accounts you will see that the year under review has closed with a balance at credit of profit and loss account of £13,410.20 including £15,900.91 for 1908 and your directors propose to pay a dividend of 7% on the paid-up capital, amounting to £17,700.00, and after making the usual provisions for depreciation and legal reserve fund to carry forward £15,500 to new account.

If any shareholders desire information I shall be pleased to furnish it to the best of my ability. No questions were asked, and the following resolutions were then adopted:—

Proposed by the Chairman and seconded by Mr. Hostler: That the report and accounts as presented be passed.

Proposed by Mr. Mittag and seconded by Mr. Ho Hsien-chuen: That Mr. Hostler be re-elected a Director of the Company.

Proposed by Mr. Arnhold and seconded by Mr. Hostler: That Mr. Schults be elected a director to take the place of late Mr. Woo-Saw-chin.

Proposed by Mr. Niclussen and seconded by Mr. Grosser: That E. Geracie be re-elected auditor of the company for the current year.

The Chairman thanked those present for their attendance.

A vote of thanks to the chairman was recorded and the meeting thereupon terminated.

A SILLY SAYING.

"It is a common, but silly opinion prevailing among a certain class of people that the worse a remedy tastes, smells or hurts, the more efficacious it is." So says a well-known English physician. He further adds: "For example, let us consider cod liver oil. As it is extracted from the fish this oil is so offensive to the taste and smell that almost everybody abhors it, and many cannot use it at all, no matter how badly they need it. Yet cod liver oil is one of the most valuable drugs in the world, and it is the greatest pity that we have not thus far been able to free it from those peculiarities which so seriously interfere with its usefulness." This was written years ago; the work of civilising and redeeming it however has since been triumphantly accomplished, and as a leading ingredient in the remedy called

WAMPOLE'S PREPARATION.

the oil retains all its wonderful curative properties with no bad smell or taste whatever. It is palatable as honey and contains all the nutritive and curative properties of Pure Cod Liver Oil, extracted by us from fresh cod livers, combined with the Compound Syrup of Hypophosphites and Extracts of Malt and Wild Cherry, creating a medicine of unequalled power for the diseases most prevalent and fatal among men, women and children. There is no other remedy to compare with it. It increases the digestive power of the stomach and in Blood Impurities, Weakness, Loss of Flesh, Throat and Lung Troubles, Nervous Dyspepsia, Scrofulous Affections, Thinness and Slow Development in the young, it gives quick and certain relief and cure. Dr. G. C. Shannon, of Canada, says: "I shall continue its use with I am sure, great advantage to my patients and satisfaction to myself." Has all the virtues of cod liver oil; none of its faults. You may trust it fully; it cannot disappoint or fail. One bottle convinces. Sold by all chemists.

HONGKONG, TUESDAY, MARCH 22, 1910.

PUTTING HER HOUSE IN ORDER.

It has been a standing reproach against many Japanese manufacturers that they have far too frequently preferred to palm off cheap and shoddy goods on unsuspecting foreign buyers, wholesale and retail alike, instead of endeavouring to build up a solid and reputable business in articles which would redound to the credit of the producer as well as to the character of the Empire. There is no doubt that the evil does exist in numerous cases, for the fact has been admitted by guilds of Japanese merchants and steps have been taken to deal with the situation and to consider how a change may be brought about in the quality of the manufactures sent abroad. While that is so, we do not put entire faith in the disinterestedness of those who cast aspersions on Japanese goods. It is possible and even probable that those very parties who are loudest in their outcry against the Japanese are themselves the chief gainer, and their fanciful allegations are in many instances merely intended to "save their face."

The glib customer, who believes all

that he is told by a voluble sales man is an important asset to a firm which may not be averse from adopting shady practices to obtain business. If a customer desires a cheap and meretricious article, the active merchant—to say nothing of the unscrupulous one—will strain every nerve to see that he gets it; and if in the end the goods prove to be inferior to what was desired then the blame is thrown on the manufacturer who has only pandered to what is known as a "felt want." In this way reputations are tarnished and business is lost. But the Japanese are not the only people on the face of the earth who deal in shoddy. All the bronze Buddhas which are sold in London do not come from Siam; nor were all the wooden gods exported for appearance sake carved by African hands. America is not alone in providing wooden nutmegs for guileless housewives nor is all the champagne on the market the product of France or the whisky the product of Scotland. Of course, two wrongs do not make a right, but we think Japan has suffered more from her detractors through sheer misrepresentation than other countries, which shall be nameless, which are equally blameable in trying to foist inferior articles on an unsophisticated public. Nevertheless it is well that Japan should recognise how precarious a thing is to retain reputation and if she is to stand well in the eyes of the commercial world it is the duty of her manufacturers to set their house in order. That fact has been taken to heart by the Yokohama guilds of Japanese merchants, with the result that they have formulated a memorial on the subject which has been presented to the Government of Dai Nippon. As we have said, the guilds admit that there are defects to be remedied on the side of the Japanese but very properly they point out that they are not the only offenders. Dealing with the Japanese standpoint it is declared by the memorialists that "many of the goods which are now regarded as important articles for export have either been newly manufactured or modified to suit the taste of foreign markets, but the manufacture of these goods is neither based on mature experience nor a full understanding of the taste of the purchaser. Moreover, many of these articles are more for the purposes of ornament than for practical use, and this circumstance is also responsible for having caused a general deterioration in goods for export." If this is a plea on behalf of the Japanese, we are afraid that the guilds interested are to a large extent begging the question. It is no claim to consideration to suggest that because the articles produced for export are intended for ornament they should be composed of scamped work or seek to represent what they are not. As well might it be said that silk is largely used for ladies' frocks, it should be made of an abundance of cotton mixed with a minimum of the genuine article and sold as silk at the price of silk. That is reducing the axioms as to what constitutes honest trade to an absurdity, but we fancy this paragraph in question is to be regarded more in the nature of an explanation than a claim for indulgence, in which case it can be allowed to pass muster. A better explanation of how the quality of Japanese manufactures has deteriorated is furnished in the statement that: "Most of the Japanese who engaged in the Settlement trade at the outset were recruited from the ranks of irresponsible traders who dreamed of making a fortune at a stroke, and they did not pay much attention to their reputation, as would be the case with those who carried on a fixed trade for many years. It is not surprising, therefore, that they were not very particular in the quality of goods they supplied." Competition also, we are told, has affected the quality of the goods produced by native labour and while that is undoubtedly true it is only a shadow of justification for those who "dreamed of making a fortune at a stroke." Sometimes the "cut" is successful, but more often it rebounds on the head of the adventurer. One reason which probably is at the bottom of the whole trouble is to be found in the following words: "The manufacture of most export goods is carried on under most irregular and disconnected conditions. Much trouble and delay not unnaturally arise before an order is executed, and the endeavour to execute the order at a stipulated time frequently leads to the turning out of inferior goods." Such a condition of affairs must often occur, more's the pity, and Western countries are not exempt from the practice of substituting the inferior for the superior. But now let us see if there are no defects on the other side. In passing, we like the quiet insinuation of the mild word "defects" which is calculated to pass the scrutiny of the tenderest susceptibility, while at the same time it possesses all the force of a stronger term. In the first place, then, the writers have a sly dig at the foreign buyer in these words: "Foreign buyers, as a rule, desire to obtain goods as cheap as possible because low-priced articles command a larger market than high-priced ones. They are ignorant of the industrial conditions in Japan, and do not seem fully cognisant of the fact that a low price necessarily produces inferior quality." The idea that foreigners believe cheapness to be compatible with high-grade substantially is rich, and betokens a sense

of humour which is not usually imported into commercial affairs. The same idea is repeated in the statement that: "Foreign merchants are, as a rule, destitute of a sufficient knowledge to discriminate nice points in the quality of Japanese goods. For this reason, they invariably prefer lower-priced articles to the higher-priced even though the latter is better in quality unless it is evident on the surface." Coming to the intermediary, the merchant who buys for himself hoping to sell over again to others, and to the agent representing a foreign firm, much wisdom is contained in few words. "Most of the Settlement foreigners being commission merchants they handle any class of goods if they offer profit. Consequently they often lack the necessary knowledge in some of the lines in which they deal, and they do not seem able to give careful attention to the future of the trade in particular goods. The Settlement merchants have also competition to face among themselves, and try to buy for their clients abroad as cheap as possible, with the result that they are not infrequently induced to attach more importance to prices than quality." That is the whole question in a nut shell. The buyer is not always so much concerned about the quality as he is about the price and if the article only looks like the real thing he trusts to making the greater profit by hoodwinking the public at the cost of the reputation of Japanese manufacturers. As the memorialists state: "The causes enumerated above combined have produced the steady deterioration in quality of Japanese goods. For this reason the charges of dishonesty or unscrupulousness can hardly be laid at the door of Japanese merchants or manufacturers, as the inferiority of quality has been brought about by inevitable circumstances." And now what is the remedy for this condition of things? How is the fair name of Japan to be preserved? The solution of the difficulty is given in these terms: "When the general scope of manufacturing industry in Japan shall have made more progress and the Japanese traders have come to employ more aggressive methods in business being not content, as hitherto, merely to supply what is ordered, as has hitherto been the case, the complaints regarding the inferiority of Japanese goods may be lessened to a material extent." That is certainly putting the case very mildly, but it is certain that if manufacturers refused to sell inferior goods even in the face of strenuous competition the cry about quality would be silenced. But is not expecting too much of human nature to believe that one man will be content to starve for a principle while a less scrupulous dealer next door is making a fortune, or, at least, a competence? We are afraid some other way than that suggested will have to be devised to meet the needs of the situation.

LOCAL AND GENERAL.

H.M.S. *Albatross* was docked at Kowloon to-day.H.M.S. *Albatross* came out of the Naval Dock this morning.The new tug *Atlas*, for the Naval authorities, is expected to arrive in Hongkong from England on Thursday next, 24th inst.KWA-G Tang was this morning fined \$160 or two months' hard labour for being in possession of 4 tins of opium, on board the s.s. *Sunghing*. The fine was not paid.Mr. West, master of the tug *Cherub*, will be transferred to the *Atlas* on her arrival here on Thursday, and Mr. S. Smith, late master of the Dock Company's tugboat *Edith*, will take charge of the *Cherub*.

This morning Li Kwai, alias Kwan Po, of no occupation, was taken before Mr. J. R. Wood (Second Magistrate) for returning from banishment. He was sentenced to one year's hard labour and four hours' stocks.

The eucalyptus trees, which were doing so well in Government House grounds, at Sandakan, have been all ruined by white ants. The trees have been eaten round about a foot below the ground and all of them will probably die.

A mine accident is reported from Gopeng in which a Chinese coolie was asphyxiated by foul gas, while another who went to his assistance was also overcome by the fumes. A European also made an attempt at rescue but was brought up almost insensible.

CHAN SHAN was charged this morning at the Police Court, before Mr. E. R. Hallifax (First Magistrate) with being in possession of 18 tins of prepared opium on board the s.s. *Honnam*. A fine of \$500 was imposed or three months' hard labour. The fine was paid.

REUTER'S Johannesburg correspondent states that J. Donaldson, a well-known runner, won the two years' world's championship, beating A. B. Posite, the Australian, by two and a half yards. Donaldson's time—9 3/8 sec.—is a world's record. In 1902 A. F. Duffy ran the distance in 9 5/8 sec. in New York, and in 1905 Dan Kelly, who, like Duffy, was an amateur, recorded the same time in America.

Mr. A. M. Reith, the new manager of the Hongkong and Shanghai Banking Corporation, accompanied by Mr. Stephens, the retiring manager, who is about to sail for Hongkong, made an official call Wednesday at the Ayuntamiento upon Governor General Forbes at Manila. The chief executive also received Sir Clifton Robinson, representative of the Speyer interests, and Horace L. Hagler, manager of the Manila Railway Company.

Hongkong Scientist's
"Dream."SEARCHING FOR THE ORIGIN
OF TYPHOONS.

MR. PLUMMER SEEKS TO HARNESS THE SUN

A remarkable work on "The origin of typhoons," which we confidently predict will attract the attention of meteorological experts and scientists all over the world, has just been issued from the pen of Mr. John I. Plummer, M.A., Chief Assistant at the Hongkong Observatory. It repels all preconceived ideas regarding the origin of these tremendous forces of nature which have wrought such havoc in Hongkong within the past four or five years and seeks to establish a theory which is intensely interesting even to the lay mind. Whether it will be accepted by the scientific world is another question but the work is certain to establish the reputation of Mr. Plummer as an original and profound thinker and one who must be reckoned with in the future.

Probably it will be best to state, in the first instance, the conclusions at which the author has arrived. He gives them as follows:

1st. That the earliest beginnings of typhoons must be sought for on land, and not at sea.

2nd. That the great currents which have their birthplace in the Sahara, the central parts of Asia, the plateau of Mexico and perhaps in the interior of northern Australia must not be neglected in the meteorology of the world because they are aerial, and are not felt at the surface. They must reach the sea level at some time and place and then produce results comparable with the intensity of the forces to which they owe their existence.

3rd. That one typhoon is never the cause of another, and that if a succession of them is seen to proceed from one limited area at intervals of a few days, as it is well known they are very apt to do, they are caused by separate impulses impressed on a permanent or slowly moving zone which we may, perhaps, call the meteorological equator of the globe.

4th. That typhoons once formed does not tend to coincide with another but, on the contrary, rather repels it, and in the final result the one becomes intensified, as it were, at the expense of the other.

Finally, that once the actual condition of the whole of the world becomes thoroughly known there will be no difficulty in understanding the origin and mode of working of these devastating storms, and although it sounds more like a dream than the sober anticipation of science, so to turn the superabundant energy of the sun to beneficial account to mankind, that even such unruly disturbances may become more suave and gentle in their operation.

Such are the conclusions reached after twenty years' experience of typhoons in Hongkong. We take it that the reader should not assume from the first conclusion that typhoons do not originate at sea, although that might be considered as Mr. Plummer's contention on a cursory glance at the words. On the contrary, the writer clearly states that "typhoons generally, perhaps always, originate in the open sea." What he maintains is that the difficulties attending the observation of the beginnings of typhoons at sea are so great as to be almost insuperable. But these difficulties do not exist on land to the same extent at all events.

Dr. Doberck, the former Director of Hongkong Observatory, pursued the usual course, but Mr. Plummer is convinced that in doing so his former chief was wrong and he gives excellent reasons in support of his belief. We will not go into them, or dwell on the highly technical character of the thesis in its early stages. Although there is doubt as to the place of origin—that is to say the place where they become perceptible to the trained observer, "We have also been brought to the opinion, almost to the belief, that the place of origin of typhoons is not the open sea—that is merely the point at which they become appreciable at the surface of the earth—but over land; that the cause of them, however mysterious and unexplained at present, must be sought in connection with the unequal heating of the land and the sea."

There are four regions which have attained the "bad pre-eminence" of being most prone to typhoons—the neighbourhood of Mauritius, the vicinity of the West India Islands, the Bay of Bengal and the sea which washes the South East of China, the Philippines and other neighbouring islands. To quote again: "The cause of these storms is to be drawn from these facts, that typhoons arise from local peculiarities in the land surface—using the word local in a rather wide sense—and not in cosmic influences which would at least approach uniformly for the whole world. Else why should Yokohama be more invaded by them than San Francisco, which is in nearly the same latitude, or Hongkong than Shanghai and New Orleans, or the Bay of Bengal than the Arabian Sea, which is merely on the other side of the peninsula of Hindostan? We have thus to look for the specific peculiarities which these four districts have in common, and which are not equally possessed by others, and cannot fail to notice two prominent ones. In the first place, they are all situated in the East or South East of the globe, and secondly, that they all embrace one or more of the larger tropical islands of the globe, and further, that the most remarkable of the four is not only to the South East of the largest of the continents but embraces not less than four such islands, Borneo, Mindanao, Luzon and Formosa, with Sumatra, Java, Celebes and New Guinea only just beyond its limits.

In his concluding remarks, Mr. Plummer says:

"It is a matter of congratulation that an Observatory has recently been established at Baguio, 4,500 feet up, amidst the high lands of Luzon, where it is to be hoped that the study of purely aerial currents may be examined so that further light may be expected eventually from this station. On the other hand it would be useless, or nearly so, to establish a station upon the Peak of Hongkong, the altitude is insufficient and the area of surrounding high country far too small. The Japanese have a high station on Mount Tsukuba, but this is too north to shed much light upon this question. I would not say that one on Mount Morrison, in Formosa, might not be more useful, but the point I should prefer as the site of an elevated Observatory is in North Borneo, somewhere near the boundary of the British possessions, or in Madagascar. But we shall probably have to wait many years before such a project could even be mooted.

The work as the reader will perceive is intensely absorbing to every thoughtful mind and if it may not bring the writer momentary reward it will certainly increase his claims to distinction in the realm of the science to which he has devoted the study of a life time.

"The Origin of Typhoons" is published by Messrs. Kelly and Walsh.

HONGKONG UNIVERSITY.

CONGRATULATIONS FROM SHANGHAI.

The laying of the foundation stone of the Hongkong University on Wednesday was an event of great importance, especially to the large number of Chinese whose interests are more or less bound up with the commercial prosperity of Hongkong; writes the *Shanghai Times* editorially. In the completion of the scheme for the founding of the University generous contributions were made by British firms; but the Chinese also came forward with hearty support. It is to be noted that British merchants of Indian extraction took a prominent part in the inauguration and carrying forward of the plans. It can thus be rightly said that the movement for this University has been mainly Asiatic. Hongkong will prove a desirable location for a University on modern lines, by which is meant a University in which Greek and Latin scholarship are not foremost. Although situated at one corner of the Chinese Empire, it is easily available for students, and there can be but little doubt that when the University is in running order students from all parts of China will be found in its halls. It is a pity that the scheme proposed by Lord William Cecil has not been made a part of the Hongkong University, and perhaps some method will still be found by which an amalgamation of interests may take place. It can scarcely be expected that a division of forces will result in benefit for either party, and the Hongkong scheme being on broader lines than that of Lord William Cecil is sure to make a stronger appeal at present to the support of British philanthropists. We congratulate Hongkong upon the results already attained, and express the hope that future success may attend the University.

The zeal displayed by British merchants in this matter should be emulated by wealthy Chinese in all the Provinces. We have frequently called attention to the present lull in the educational movement in China. There is still much commendable activity, and many schools, both Governmental and private, throughout the Empire, are doing good work; but on the whole there is not the same zealous spirit exhibited at the present time as was found in China a few years ago. This has been due, in large measure, to the difficulty which the Government has found of appropriating large sums for educational purposes out of the present restricted revenue. Without the imposition of a special educational tax it is difficult to see how the Government can do much more in the immediate future than it is now doing. The co-operation of wealthy merchants in providing money, and of the leading literati in accepting positions as teachers, is greatly to be desired. It must be recognized that the profession of teaching is not a lucrative one, and that the establishment of good schools calls for a large measure of self-sacrifice, not only from those who contribute funds, but also from those who devote their lives to teaching. The lack of continuity of management has acted as a deterring influence in keeping young men from devoting their lifelong energies to school work; but if the co-operation of the people with the Government in the establishment of schools could be secured, permanency of management could also be maintained. It has been discouraging, in the past, for young men to give a few years of earnest work to a school, only to find themselves dismissed on account of a sudden change of official management. This could be remedied by provision which would divorce the appointments to the management of schools from ordinary official promotion. Continuity of plans is absolutely necessary for the permanent success of schools and we see no better means of attaining this desirable end than by following the example of the Hongkong University, which has the hearty support of the Hongkong Government and the co-operation of wealthy merchants.

PETROLEUM IN BORNEO.

LONDON SYNDICATE HOPEFUL.

Mr. Chittenden, general manager of the B.B. Petroleum Syndicate, before leaving for England recently, kindly supplied the *B.N. Borneo Herald* with information from which we take the following:

The B.B. Petroleum Syndicate, Ltd., have applied for a lease to work petroleum on certain lands on the West Coast, the boundaries enclosing all the territory lying between Nosong Point and Mempakul and stretching back as far as the railway. We mentioned in an earlier number that drilling machinery had already been ordered, in fact, we know that Mr. Chittenden came out this last time with the express intention of drilling.

Further geological examination, accompanied by the find of what promises to prove a very valuable oil, has, however, caused a change of plans and Mr. Chittenden in consequence returned to England by last *Mermaid*.

We understand that owing to the complicated nature of the top overlying structure, several holes may require to be drilled before the underground formation containing the oil can be correctly located; this means a large expenditure and we believe efforts are to be made to obtain further capital before commencing the task. The syndicate has so far called up but one-half of their subscribed capital, but handled as it is by practical business men the intention is, we understand, not to proceed further until first assured that more than sufficient funds are available to carry the work to a successful conclusion.

RETURN of visitors to the City Hall Library and Museum for the week ending the 20th March, 1910—

CANTON DAY BY DAY.

EXERCISE OF TORTURE.

[From Our Own Correspondent.]

Canton, 19th March.
The Canton Provincial Deliberative Council has officially addressed a despatch to the Pan Yu Magistrate asking him for an explanation why he exercised torture the other day in trying a woman, since torture is disallowed by the laws of the country.

EXECUTION.

The three alleged ringleaders in the recent mutiny of the new regiment in Canton, who were sentenced to death by Viceroy Yuan Shu-Huan, were yesterday taken out of the Pan Yu prison to the execution ground and beheaded.

NANHAI MAGISTRATE.

The newly appointed Nanhai magistrate, Wong Ting, arrived here on the 17th instant, and will assume charge of office in the course of a few days.

NEW HOSPITAL.

A large and splendid building erected at Houam, not far from the Government Cement Factory, for the newly established Yau Chai Hospital, has been completed. The opening ceremony of this institution will take place on the 23rd instant.

NO PASSPORT.

Yesterday the Kwangsi Authorities sent an officer to escort a Russian subject, whose name is unknown, to Canton and hand him over to the Viceroy to be dealt with. The Russian was not in possession of a passport, while travelling in the interior of the Kwangsi province. The Viceroy has accordingly sent him on to Hongkong to be given over to the charge of the Russian Consul there.

OUTRAGEOUS GANG ROBBERY.

Canton, 21st March, 1910.
On the 19th instant a gang of robbers numbering over a hundred attacked a pawnshop in the village of Sui Chao, in Shun Tak district. As the shop building is very strongly built, and its doors barred with iron bars, the robbers could not gain admission into the premises. Annoyed at their failure to reach the treasures stored in the pawnshop, the robbers set fire to the building and four persons perished in the flames, while half a dozen others were severely injured. The building was completely destroyed.

AN ABORTIVE RIOT.

In the evening of Saturday last no less than two thousand people gathered round the theatre in the western suburb, and appeared to be in a state of great excitement and threatened to destroy the building. What led to the riot is at present unascertainable. But it is learnt that the day performance on that day stopped at 6 p.m. being two hours earlier than usual, and it is surmised that the audience became irritated in consequence. On being informed of the abortive disturbance, a large number of police was at once sent to the scene to preserve order and the crowd was dispersed. The residents in the neighbourhood were for a time in a state of great alarm.

THE DISBANDED TROOPS.

With reference to the recent motion of the new regiment in Canton a resolution was passed at a meeting held yesterday by the Canton Self-Government Society to the effect that the Society and the Provincial Deliberative Council should forward a joint petition H. E. Viceroy Yuan urging him to reconsider the case and to allow the disbanded troops to be re-allocated in the Canton Military service.

OBITUARY.

STAFF-SURGEON FRASER, R. M.

The news of the death at the Nursing Home yesterday morning of Staff-Surgeon A. F. Fraser, of H. M. S. *Flora*, was received with profound regret by the many friends that he has made during his short service in Shanghai; his loss will be deeply felt by his associates, says the *N. D. C. News* of 19th inst. The late surgeon had been ill for some weeks and although recently little hope had been entertained of his recovery, yet it was sincerely hoped that he would pull through his severe illness.

Arthur Forbes Fraser entered the service as a surgeon in 1900, having qualified at Edinburgh, of which university he held the M. B. degree. After passing through the course at Haslar Hospital, Portsmouth, he served in succession in H. M. S. *Pembroke*, *Superb*, *Rivindell*, *Fernside*, *Wildfire*, *Landrail*, *Albatross*, thence he went to the *Surprise*, the yacht of the Commander-in-Chief in the Mediterranean, at that time Lord Charles Beresford. From the Haslar Hospital, where his work as one of the resident surgeons and his ever-ready help and advice to the junior surgeons just entering the service, were greatly appreciated. He was promoted staff-surgeon in February 1908, and on completing his appointment at Haslar in July 1909 he was appointed as senior medical officer to H.M.S. *Flora* (September 7, 1909). He will, of course, be given a Naval funeral, and we understand that it will take place this afternoon.

LINGGI PLANTATIONS, LTD.

In connection with the issue of Kamuning B. Shares to Linggi shareholders, Messrs. Guthrie & Co., of Singapore, are informed by cable that shareholders will be allowed up to 4th June to exercise their rights.

The U.S. transport *Warren*, which has been undergoing repairs in Shanghai, will be despatched about April 10, and will proceed from that port to Haiphong, where she will take on board 8,000 barrels of cement for the quarter-master's department at Manila. It is expected that the *Warren* will get into Manila about April 15.

SUGAR REFINING IN JAPAN.

EXCESSIVE PROTECTION OF FORMOSA INDUSTRY.

The *Nichi Nichi* publishes an interview with a certain prominent business man who is interested in the sugar industry regarding its future in Japan Proper and in Formosa. This authority declares that the Government is giving too much protection to the sugar industry in Formosa even at the cost of its decline in Japan Proper and he is inclined to believe that though the industry is in a very prosperous condition in Formosa at present, the excessive protection may ultimately lead to an adverse reaction. The writer proceeds:—

"The existence of a feeling of antagonism between the sugar men of Japan and Formosa arising out of a conflict of their interests would be most deplorable from the standpoint of national economics. Since the revelation of the notorious scandal that has shaken the credit of Japanese economic circles, to its foundation, the public has come to believe that 'corruption' in some shape or other is inseparably attached to the sugar industry problem. In such circumstances, it is not unnatural that those who are interested in the industry are refraining from any movement having the object of securing the protection of the State. Looked at from the viewpoint of the consumer, the present policy of the Government leaves much room for improvement, and it is almost certain that, unless the situation is ameliorated, an active agitation against the Government will break out sooner or later."

"When Formosa fell into Japan's possession as a result of the Japan-China War the Government set about the encouragement of the sugar industry on the island by according every available assistance in its development. Protection or encouragement is given in various forms and under different names, and it is estimated that altogether Formosan crude sugar receives assistance amounting to 70 to 90 per cent. of its value. It is not surprising, therefore, that the sugar industry in Formosa is becoming more and more prosperous. So far 40 million yen of capital has been invested in the industry on the island, and the annual production is returned at 300 million kin."

"The sugar industry in Japan Proper, on the other hand, is receiving practically no particular protection except an annual subsidy of ¥50,000 which the Government is delaying for the encouragement of the industry in Okinawa prefecture. This is a mere bagatelle compared with what the Government is doing for Formosa. When the revised tariff comes into operation and the duty on crude sugar is raised to 50 per cent, the refiners will be prevented from using cheap Java sugar at present, and will be obliged to use Formosa sugar, which is comparatively higher in price. The market price of sugar, turned out by using the Formosa material will be ¥2.05 per 100 kin at the lowest. Such an increase in the price will be keenly felt by the consumer, who will not doubt be gradually obliged to dispense with the use of white sugar altogether in favour of brown. Thus the sugar refiners in Japan will be plunged into difficulty side by side with the growing prosperity of the Formosa sugar men. At present 100 million kin of Java sugar is annually imported into Japan, but it is computed that one-third of this amount, that is, 40 million kin, is to be obtained from Formosa this year. The decline of the refining industry in Japan will not be conducive to the advantage of Formosa in the long run, as the falling-off in the demand for crude sugar together with the growing increase of production will result in the loss of the equilibrium between demand and supply. Altogether it looks inevitable that a serious question will arise on this subject unless the Government is induced to pay more attention to the welfare of sugar refiners in Japan Proper."—*Japan Chronicle*.

LUGGY COMPETITION.

HONGKONG FOOTBALL CLUB vs. THE NAVY.

Yesterday the Club met the Navy in the above competition at the Hongkong Football Club ground before a large gathering of spectators. The Club had an easy win. The teams lined up as follows.

H.K.F.C.—Blackburn, Oliver, Kilby, Pearce, Ferrier; Claxton, Clarke; Lester, Temperley, McIlraith, Robertson, Courtney, Ravenhill, La Fontaine and Hutchinson.

Navy: Piddock; Annheim, Heppel, Campbell, Crowley, Glister, Turner, Highton, Dennison, White, Johns, Lubbock, Sloman, Heenan and Davies.

The Navy opened the game, and a good and fast one it was. The Club made a good few runs up the field, but no tries could they make. Later Claxton got possession of the leather and passed it to Pearce, the latter on return passed it to Piddock, who made an excellent try. This was taken by McIlraith, who scored the first goal for the Club. The play was now very close and both teams tried hard to score a try, which they could not do. Later Claxton again pushed to the front and passed the ball to Pearce who made a run up, and passed the sphere to Oliver who scored a try. This was again taken by McIlraith who put up a second goal for the Club. The Naval men now did not let the Club take things easy and their fullbacks played a good game. A few minutes before half time the Navalmen had a try the credit of which fell to Sloman, and Crowley scored their first goal. The whistle then went for half time and the scores stood:—

H.K.F.C. 2 0 10
Navy 1 0 5

At the early part of the second spell the Navy played well and had a try which Crowley shot too wide putting the Navy 8 up. The Clubmen now did not give the sailors many opportunities and made many a good run, when Claxton scored on try. About the end of the game the Club scored another try, but failed to score a goal. The Navy then made many attempts to equalise but no further scoring was done when the whistle went for time.

The goal scores were:—
H.K.F.C. 2 0 10
Navy 1 0 5

SAN FRANCISCO'S ORIENTAL NEWSPAPERS.

San Francisco's Oriental newspapers are the wonder of the journalistic world. There are eight of them, all dailies—four Chinese and four Japanese. Each has its own building, a really metropolitan staff of reporters and writers, and an editor whose sense of news-values is as acute and up-to-date as the average American's.

Contrary to general expectation, perhaps, the Chinese papers are the largest and best. They are located within two blocks of one another in the rehabilitated Chinese quarter, which is now one of the handsomest and most substantial as well as most sanitary sections of the new San Francisco. A modern two-story concrete building is the humblest domicile of the San Francisco Chinese newspapers while a four story brick is the most pretentious. The other two are three stories in height and also of brick.

The Japanese newspapers are domiciled in three two-story and one single-story buildings. Two are of frame and two of brick. They are scattered over a considerable area, about half a mile apart, and but one is near the Chinese section. This is the *Telegraph* on Sacramento near Stockton streets. The *Sakshi* on Shumou or Japanese *Daily News* occupies a former dwelling-house and has the smallest circulation of all, its subscription list being about two thousand copies. The *New World*, housed in a frame building at Geary and Lowell streets, has the only Web Perfecting (flat bed) Press in the city with a capacity of six thousand twelve-page papers per hour, while the Japanese *American* has the best building and most up-to-date equipment, generally of the Japanese dailies.

The Chinese papers, in sharp contrast to their Japanese contemporaries, have each a marked individuality, a strong policy and a definite aim aside from money-getting. The *Tai Tung* or *Chinese Free Press* is probably the most aggressive and forceful in this regard. It is the official organ of the Chinese Free Masons Society, a very powerful organization which has thousands of wealthy members, and to which about one-eighth of the entire Chinese people belong.

A very interesting Chinese daily is the *Sai Chi Yai* or *Chinese World*, edited by a young, California-born Chinese named Robert L. Parr. The *World* is probably the most thoroughly Americanized of San Francisco's Oriental papers. It has a staff photographer, a corps of reporters who can write a news-story in English as well as in Chinese, and who cover the police courts, city hall, incoming and outgoing steamers, with remarkable thoroughness. The *World* publishes daily half-lobes of news events and will soon install an engraving plant—a dignity to which no Oriental paper in America has yet attained. The *World* is an afternoon paper and, while having no telegraphic service, prints a very complete line of cable news, translated and "boiled down" from the American morning papers. It has correspondents all over the Pacific Coast and a representative at Peking who occasionally wires some news item of importance in addition to his regular mail service. The circulation, though small not exceeding five thousand copies, is almost unlimited geographically. The *World* goes to a score of different American cities, and has subscribers in Asia, Africa, Europe, Australia and Hawaii.

The *Chung Sai Yai* Po has for its editor perhaps the best known English-speaking Chinese in the West. This is Ng Poon Chew who ranks with Wu Ting-fang as a celestial humorist and raconteur. Ng Poon Chew is fond of saying that he is almost American-born. "If I had come fourteen years earlier," he expresses it, "I would have been an American citizen. I have always regretted that I did not, but when I arrived here it was too late." Mr. Ng (the Chinese family name comes first) is in continual demand as a lecturer, and makes a great deal of copy for the American papers by his quaint, forceful remarks, before classes at California and Stanford Universities, women's clubs, at banquets, etc. He was educated in American schools, and speaks English as well as any foreigner could. He is very particular about the diction used in his paper, and has two Chinese association editors with all sorts of college degrees to write editorials and keep literary errors out of the *Chung Sai Yai* Po.

The *New Era* is a paper with a unique history. It was established by the Yee family, which is the clan from which nearly all the Chinese laundrymen come. For hundreds of years the Yees have been "washers, washers" men, and the departure of one of that kin from this time-honored profession to the ranks of journalism caused a rupture which for many years was not healed. The *New Era* is now, however, controlled by a stock company, and is published in a four story brick building of noble proportions and excellent appointment.

FAR EASTERN POLITICS.

ATTACK UPON BRITISH POLICY.

London, March 17.
Telegrams from Peking have been received here announcing that, owing to severe diplomatic pressure, the Waiwu-pu has been forced to abandon the negotiations in regard to the Chinese-Algun Railway. China's sole hope now is for outside help.

The news has caused much surprise and resentment.

Major E. C. Mosey-Thompson, Unionist Member for E. Devon, has given notice of a question to Sir Edward Grey, Secretary of State for Foreign Affairs, asking what instructions have been given to Sir John Jordan, H. M. Minister at Peking, in view of the new development affecting British trade in particular and the open door principle in general.

Mr. Pauling (one of the concessionaires), writing to *The Times*, affirms that Japan has persistently opposed by every means in her power the construction of the Chinese-Algun Railway. Now Russia seems to be copying Japan. The British Government has simply said that to Japan. "It is wonderful," Mr. Pauling asks, "that resentment is felt in America at these flagrant treaty violations? Why may not China develop her own territory? Why does England, formerly leading the way in China, throw cold water on a project strongly supported by the United States, with whom surely she might see eye to eye in Far Eastern matters?"—*N.Y. C. News*.

BANK ACCOUNTANT'S DEATH.

SAD CASE OF CHRONIC ALCOHOLISM.

On February 16, an inquiry was held at Kensington with reference to the death of Percy Russell, a bank accountant, who died at an hotel at South Kensington on February 12.

Mrs. Russell, widow of a stockbroker, said that the deceased, who was her son, had been in a bank at San Francisco, and after the earthquake he was sent to Shanghai and Hongkong. After leaving San Francisco, he took to drink, and last year was sent home to England on sick leave, owing to his intemperate habits. In London, he was seen by Dr. Haultain, the medical officer of the bank, who said he had kidney disease. For a short time he was in the Keeley Institute. He came to the hotel on December 27, and while there he had been drinking heavily, and had been told by the doctor that if he did not stop he would kill himself. He did not seem to care much, as he had failed to pass his examination to go abroad again. He was never drunk, but was peculiar and had delusions.

Mrs. Duke, the manageress of the hotel, denied all knowledge of the deceased's intemperate habits. She said that when he first came to the hotel he had a companion. All spirits were entered by the book-keeper.

Norah Pepper, a chambermaid, said sometimes the deceased would slip in bed all day. Frequently she had taken him up two bottles of gin a day, and he had appeared dazed. She had, however, never reported it to the management.

The mother stated that the person referred to as a companion was really an attendant from a diplomatic institute.

Grace Ackerman, the book-keeper, produced her books, which showed that while this companion was in attendance upon the deceased there was no diminution in the supply of drink. Sometimes there would be two bottles of spirits, besides wine, supplied each day. Since the companion left there had been generally supplied two bottles of spirits per day and wine in addition. The witness also admitted that the books showed as much as 11s and 14s charged per day for spirits.

Dr. Arthur Grayling, living at Forest Gate who had known deceased from childhood, said deceased was a man known among his class as a "sober" who was constantly "nipping," but never drunk.

Dr. Bridges, who was called after death, said, his postmortem showed signs that the deceased suffered from excessive alcoholism in the principal organs and that death was due to pneumonia and Bright's disease, accelerated by excessive alcoholism.

The jury returned a verdict that death was due to chronic alcoholism.

CRICKET.

TELEGRAPHS & DODWELLS' C.C. v. CIVIL SERVICE C.C.

This League match was played at Happy Valley on Saturday afternoon, and resulted in a win for the Telegraphs & Dodwells' C.C. by 5 wickets. Scores:—

H.E. Hsi Liang gave a dinner on the 16th inst. to the Chinese and Japanese journalists of Mukden.

H.E. Shou Hsue, Vice-President of the Army Board, acts as interim Minister at Peking.

M.R. W. J. Calhoun, the recently appointed United States Minister to China, has left San Francisco on the T. K. K. S. *Tsuyo Maru*.

H.E. Tjeh Liang's resignation has been accepted. H. E. Yih Chang, Minister at Berlin, succeeds to the portfolio of Minister of War and leaves Germany for Peking.

THE torpedo-boat destroyers *Roche* and *Outrigger* have been badly damaged as the result of a collision during tactical exercises off Beachy Head. The destroyers were towed to Devonport.

THE Opium Regie in Indo-China finds itself in difficulties owing to the suppression of poppy growing in Yunnan and the steadily increasing demand of the Bazaar drug. The only remedy is a rise in the rates charged by the Regie to consumers.

IN an article on the Indian Budget, *The Times* refers to the peculiarity of the Calcutta debates and suggests it is time for the Council to reflect on the disability of refusing written speeches except under special circumstances or from new and inexperienced members.

THE figures compiled for the year just passed show the Philippine Islands to have produced 1,556,744 piculs of copra, thus making the islands the largest single producer of this staple in the world, excelling in production either Java, the Straits Settlements, Ceylon or the South Sea Islands.

"BEN" LINE OF STEAMERS.

NOTICE TO CONSIGNEES.

S.S. "BENVENUE" FROM ANTWERP, MIDDLESBRO, LONDON AND STRAITS.

CONSIGNEES of Cargo are hereby informed that all Goods are being landed at their risk into the hazardous and/or extra hazardous Godowns of the Hongkong and Kowloon Wharf and Godown Co., Ltd., whence and/or from the wharves delivery may be obtained.

No Claims will be admitted after the Goods have left the Godowns, and all Goods remaining undelivered after the 29th inst., will be subject to rent.

All Claims against the Steamer must be presented to the Undersigned on or before the 5th prox., or they will not be recognized.

All broken, chafed, and damaged Goods are to be left in the Godowns, where they will be examined on the 29th inst., at 11 A.M.

No Fire Insurance has been effected.

Bills of Lading will be countersigned by GIBB, LIVINGSTON & Co., Agents.

Hongkong, 22nd March, 1910. [268]

TSINGTAO DOCK.

A PROSPEROUS TIME.

Writing under date Tsingtao, 10th inst., the correspondent of the *N. C. D. News* states:—The Tsingtao Dock seems to be having a very prosperous time to judge from the amount of work which is accumulated about the place and the strenuous overtime on which the hands are working. An attempt to cut down the privilege of the operatives resulted a few days ago in a little unpleasantness. Owing to the pressure of work the manager gave notice that the custom of closing at half-past five on Saturday when the wages were to be paid (which had, previously, been 4:30) would be discontinued, and work would continue as usual till 5:30. This seemed to be the proverbial last straw, and the Chinese employees threw down their tools and walked out. The manager and superintendent attempted to make them return to work, but without success. They were soon surrounded by a yelling mob, each man screaming his own particular grievance in the usual Chinese style. It came to such a pitch that some of the crowd threw stones at the manager, but without any serious result. The police were called in and the matter was settled in some way, the details of which are not known. At all events the operatives went back to work the next day and all seems to be going on as usual.

In view of the fact that the men are well paid for the overtime, it would seem that they would have little ground for complaint. It shows how narrow a margin there is at all times in the relations of the Chinese and their employers.

WE (*British North Borneo Herald*) are officially informed that instructions have been received from England to proceed with the opening of a new rubber estate near Lingkong, on the Beaufort-Weston line. Work on the estates at Tawao on the East Coast, and Mawao on the Jesselton-Beaufort line is also to be proceeded with as rapidly as possible. We trust that this portends the formation of several new companies.

Events Coming.
